## PROJECTS / EXPERIENCE

### Menus For All (05/2020 – Present)

- Developed a restaurant finder web application built with React and Firebase.
- Employed OAuth to enable login using verification from a Google account.
- Heavily incorporated the use of React hooks (especially useContext) to simplify code and omit the need for Redux.
- Emphasized transitions, animations, and a minimal palette to construct a UI aiding in a clean UX.
- Leveraged browser geolocation with user consent to find nearby restaurants.
- Utilized axios, JavaScript promises, and async functions to make HTTP pull requests from the Zomato API.

### Vanilla Tetris (02/2020 – 03/2020)

- Developed a Tetris game built with Vanilla JavaScript, HTML, and CSS.
- Incorporated statistics and local high scores, using local storage, to create a sense of pride and accomplishment to the user.
- Designed dynamically sized rendering using media queries and reading window sizes to ensure high quality graphics from html canvas.
- Leveraged JavaScript inheritance to modularize code and optimize production.

### Spotlofi (12/2019 – 02/2020)

- Developed a lo-fi music web application built with React, Redux, Rails, and PostgreSQL.
- Incorporated the React Player npm package to easily construct an audio web player providing a pleasurable UX.
- Implemented active storage with AWS S3 to host music and image files to ensure scalability, and reduce server load.
- Constructed functional components over classes to ensure standardization, increase readability across application, and reduce the size of the code base.
- Took advantage of webpack to quickly adapt changes onto the browser for a faster work pace.

## SKILLS

JavaScript ReactJS Redux Apollo  
GraphQL Ruby Ruby on Rails C++  
NodeJS HTML5 CSS3 SQL Firebase  
MongoDB Git AJAX MVC OOP TDD  
jQuery Axios DevOps

## EDUCATION

### Study Program App Academy

09/2019 – 03/2020

#### Courses

- Full Stack Web Development

## INTERESTS
